

-Importing of candidates-: when trying to import a candidate that is already in the system, it should only be possible for candidates at the screening stage. Currently it is possible to replace a candidate even if they are passed the screening stage (shortlisted, invited for interview). This should not be possible. The only place we should be able to remove the candidate after the stage of screening is under tools =>discard candidate and update candidate.

-When trying to screen multiple candidates it says they are screened, but you can see that the status doesn't change and they are not being screened.

The screenshot shows the 'International Draft Recruitment - Screening' application. The main window displays a table of candidates with columns: ID, Name, DOB, Country, Drv Lic, Cat, Ref, Title, #, Status, Regime, and Application. A modal dialog box titled 'EAP-TEST' is open in the center, displaying the message 'All selected candidates were positively screened' and an 'OK' button. Below the table, there are buttons for 'Screen all selected', 'Screen for all positions', 'Screen Positive', 'Screen Negative', 'Screen Conditional', and 'Screen for all positions'. At the bottom, there are sections for 'Remarks' and 'Candidate details'.

Andrei: Fixed ,see below.

-When trying to individually screen each candidate, this is the error message popping up. However as you can see in the print screen, the candidates status changes to "screened positively" but the screening window still remains open and available for screening the candidate again.

When screening a candidate for multiple positions, it screens even if a candidate has already passed the stage of screening for at least one priority (see 2 print screens below). This should not be possible. If a candidate is already processed further for at least one priority, when trying to screen him for all positions there should be a pop up message saying that *the candidate has already been processed for one or more of his priorities and screening can only be done for individual priorities not for all positions*.

-Screening positive for multiple candidates does not work. Andrei: Fixed.

-Remarks are sometimes not being saved even when added directly in the remarks box. If/when saved they are not removed when a candidate is screened positively afterwards. Andrei: Fixed, related to previous bugs.

-Colors for different screening status suddenly disappeared

-The buttons for shortlisting and schedule interview are not being expanded automatically all the time.

- A warning pops up while trying to shortlist a candidate. It pops up I guess when there is no Ref. no selected, but besides the possibility to select a ref. no. for HRO there should also be a column of position and ref. no. added to be able to see what are the candidates shortlisted for. And if a candidate cannot be shortlisted without selecting a ref. No. the pop up message should say exactly that.

-No remarks are shown for the conditionally screened candidates. Panel should be able to see the reasons why the candidates were screened conditionally and any other remarks added for their attention.

-When filtered by regime, only the not marked and shortlisted candidates are visible. The not-shortlisted candidates are not visible.
