

#	Application	Title	Description	Priority
1	ALL APPS	Platform Upgrade	Upgrade the following: - Application Server - Java EE - Database Server	1-High
2	ALL APPS	Compatibility with latest IE version	All applications should be compatible with the latest IE version (IE11)	1-High
3	CAMEO	Overall Graphical User Interface improvement	<p>The user interface of CAMEO should be fully updated in order to provide a user-friendly and elegant application, which will comply with the latest web standards and will be more interactive with the user.</p> <p>Furthermore, the 'look&feel' and the design should be similar to the rest CAMEO applications (e.g. SIRA, WebSAA, etc.) so that a common approach is followed regarding the GUI of all CAMEO applications. This includes all applications having the same style of notifications</p> <p>Additionally, the following improvements should be made:</p> <ol style="list-style-type: none"> 1. Horizontally align buttons in 'Modify SDA' form and Distribution list page (IE9) 2. Horizontally align the 'Number of results' and 'Showing' elements (displayed above and below each list) with the rest of the pagination elements in the CAMEO Roles and Directory Service Accounts lists (IE9) 	1-High
5	CAMEO	Replace Text Links with Icons	<p>The links displayed above and under lists (e.g. Accounts list, Account Groups list, Directory Service Accounts list, Quick search list, Advanced search list) to be replaced by icons.</p> <p>Icon title to be displayed upon hovering on an icon.</p> <p>All icons to be displayed on a single row.</p>	1-High
6	ELMA / CILMA	Overall Graphical User Interface improvement	<p>The user interface of ELMA / CILMA should be fully updated in order to provide a user-friendly and elegant application, which will comply with the latest web standards and will be more interactive with the user.</p> <p>Furthermore, the look&feel and the design should be similar to the rest CAMEO applications (e.g. SIRA, WebSAA, etc.) so that a common approach is followed regarding the GUI of all CAMEO applications</p>	1-High
7	ELMA / CILMA	Workspace Home Page restructuring	<p>The content of the Home Page should be reorganised into a more readable, comprehensive and user-friendly structure.</p> <p>E.g. The different paragraphs/subparagraphs should be distinguished from each other by creating different sections, the 'Contact us' section should be placed in the bottom of the page as footer, etc.</p>	1-High
8	ELMA / CILMA	Document Management Service	Incorporate Document Management functionality and integrate it with the Lessons module.	1-High
9	ELMA / CILMA	Forum Service	<p>A forum can be established to facilitate the sharing and dissemination of lessons and best practices in the community of users network.</p> <p>The forum entities may be interconnected with the various lesson entities.</p>	1-High
17	CAMEO	Search engine improvements	Allow queries to contain only "*" (to retrieve all existing records)	1-High
18	CAMEO	Auditing functionalities	<p>General: Most of the reports cannot be used further in a more demanding administrative context. The functionalities and the result lists should be developed to answer better to administrative/auditing actual requirements.</p> <p>Examples:</p> <ol style="list-style-type: none"> 1. Errors section: "Error Description" should be more detailed, to contain the exact "Error msg" given by the system, in order to ease the admin work and analysis of past events. 2. Search section: <ol style="list-style-type: none"> 1) User Name field to have hyperlink to the actual account for a quick access. 2) Advanced Search field: to be analysed if including the actual targeted fields would bring an added value? 	1-High

19	CAMEO	Group functionalities (initiated, to be continued)	From Wieslawa GOGH-"Change the group functionality v 0.4.doc": 1. Possibility of re-use the same name if group is deleted. Proposal: deletion of group should be always physical. 2. Add paging and sorting mechanism to view/modify group page. 3. When a group is modified, notification is sent to all Content Managers of SDAs where the group is used in roles. Information contains info which group was modified, in which role of which SDA the group is used, who was added/deleted to/from the group. 4. Display Information about users/groups having access rights in the SDA. Info accessible for Content Managers of such SDA. Service similar to "More information"	1-High
20	CAMEO	Improvement of logging functionalities	More elaborated: 1)Content level (Text that was added/updated) 2)Field level	1-High
21	CAMEO	WIKI approach	This is new and involves analysis and big development effort	1-High
22	CAMEO	Thorough update of the Forum		1-High
10	CAMEO	Home Page restructuring	The structure and the content of the Home Page to be revised, in order for it to become more informative and useful to the user. Consider personalised home pages.	2-Medium
11	CAMEO	Replace html drop down list and button by icons	On the Information Auditing page, after clicking on the 'View' button, the following objects may be removed and replaced by relevant icons for the respective actions (download to pdf, excel and xml): - Drop down list with values PDF-EXCEL-XML - Button 'Download Report'	2-Medium
4	CAMEO/ELMA	Review messages	Review all messages for typos and align them among the applications	3-Low
12	CAMEO	Charts Generation	Introduce charts (piecharts, bar charts, etc) in the Auditing Statistics page of a selected parent	3-Low
13	CAMEO	Statistics for Calendar Module	On the Auditing Statistics page, statistics to be also provided for the creation and view of meetings/events during a specific time period	3-Low
14	CAMEO	Empty List should display relative message	Whenever a list does not contain any rows (i.e. empty), a relevant message should be displayed in the first row of the list. Currently, only the headers row of the list is presented.	3-Low
15	ELMA / CILMA	Remove duplicate menu	The menu items of the 'Administration' menu provide the same options with the icons displayed on the top of each page related to the Administration section. One of the two menus could be removed to avoid duplication. Similarly for the Lessons menu.	3-Low
16	ELMA / CILMA	Replace Text Links with Icons	The links displayed above and under particular lists to be replaced by icons. The icon title could be displayed upon hovering on an icon. All icons could be displayed on a single row.	3-Low
