

# CAMEO

## Implement new file naming convention in CAMEO

*HELPLINE-CAMEO*

*e-mail: [helpline-cameo@eeas.europa.eu](mailto:helpline-cameo@eeas.europa.eu)*

- ❑ File naming convention adapted to present EUMS, EU Missions and Member States needs
- ❑ Niels Munk discussion on 23/06/16: The new file naming convention will also cover the codification/identification needs of the member states. It is a NATO based approach.
- ❑ Niels Munk still to deliver field values;
- ❑ Goals of present analysis:
  - Identify the development impact of new file naming convention on CAMEO application

# NEW FILE NAMING CONVENTION

## ❑ Metadata (separated by dashes '-')

- 'Date' in Reverse Order i.e. "20160520"
- 'Classification' (e.g. "R-UE", "S-UE", "C-UE")
- 'Subject' (words separated by underscore '\_')
- 'Information Owner' (e.g. "BE", "BG", "CZ", "DK", "EUMS".....)
- 'Author' replaced by 'Originator'
- 'Originator' = composite field; 'Originator' composing fields:
  - 'Information Owner' ( e.g. "NL", "EUMS", "EU SATCEN")
  - 'Department/Unit' ( e.g. "EUMS3", "EUMS4", "MOD" etc)
  - 'Originator'(e.g. TBP)

## ❑ Examples

20160523-EUR-*Subject*-EUMS\_EUMS3\_CON/CAP

20160629-EUC-*Subject*-NL\_MOD\_NL\_*Originator*

# IMPACT OF NEW METADATA FOR FILE UPLOADING FORM

- ❑ Keep most of the existing METADATA of file uploading form
- ❑ 'Date' format to be changed; no impact
- ❑ Replace 'Author' by 'Originator' (composite field);

## Impact:

- 2 additional drop down lists to be added on the form
- change of the actual table structure by adding 2 more columns (i.e. 'Information Owner' and 'Department/Unit' and change the name of the 'Author' column into 'Originator'; Define a new composite field 'Originator')
- change of the existing stored procedures that include the field 'Author' by replacing field 'Author' with ['Information Owner'- 'Department/Unit'-'Originator']
- add two more drop down lists (i.e. 'Information Owner', 'Department/Unit' and change the existing 'Author' name into 'Originator') for the forms that allow file searches
- change of all existing search queries that involve 'Author' field

# CONCLUSIONS

- ❑ The actual file uploading form is kept for all users (including SATCEN and Member States). No major impact for the actual users.
- ❑ 2 more columns ('Information Owner', 'Department/Unit') to be added in the table that contains the file uploading metadata. Existing 'Author' column to be changed to 'Originator'.
- ❑ Change of all stored procedures, including search ones, that involve the field 'Author'
