

## Testing ISR:

### 1. Screening for ALL positions:

- I tried to screen one candidate for all positions, he was unprocessed and had only one priority, error message showed up.

- When I tried to screen positively other candidate for all positions (he was unprocessed for one and negative for two), unprocessed didn't change, but negative screenings were changed to positive. Andrei: Fixed;
- TODO: Screening: only candidates with ID\_Status in (1, 24, 25, 26); Removed (2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23,) – Q to be included in the email on what "ALL" should include.  
TODO: Preserve the location of the cursor within the dgw\_Candidates/All and for filters

- Screening ALL selected candidates for one position, when I screened 4 candidates negatively for one position, the function was working. After that decision was not allowed to change as group. When I entered one candidate and change selection to positive, all candidates that were colored with color matching screening status were discolored.
