#### 2.3 <a GroupofBusinessRules>

[Sometimes it is useful to organize Business Rules into groups to improve readability. For example, if the problem domain contains Business Rules related to both accounting and building construction (as would be the case if we were developing a system to manage construction projects), presenting the Business Rules from the two different sub-domains might prove confusing to the reader. To solve this problem, we use groupings of Business Rules. In presenting the grouping of Business Rules, provide a short description that helps the reader understand what <a GroupOfBusinessRules> represents. Business Rules presented within the group are organized alphabetically for easy access.]
