2 Windows lockdown settings

2.1 Description

The Windows 2003 security settings described in this document are based on the ISP 441 as published by the Sector "SIC Sensibles" and the settings for the BICES project from NATO. They have then been relaxed slightly to allow for Microsoft Cluster service to function properly, especially in "User rights assignment" and customized for the CAMEO environment, e.g. warning message, Oracle service names, etc.

2.2 Listings

2.2.1 Audit Policy

Audit account logon events	Success, Failure
Audit account management	Success, Failure
Audit directory service access	Success, Failure
Audit logon events	Success, Failure
Audit object access	Success, Failure
Audit policy change	Success, Failure
Audit privilege use	Failure
Audit process tracking	Success, Failure
Audit system events	Success, Failure

2.2.2 Event log

Maximum application log size	16384 kilobytes
Maximum security log size	81920 kilobytes
Maximum system log size	16384 kilobytes
Prevent local guests group from accessing application log	Enabled
Prevent local guests group from accessing security log	Enabled
Prevent local guests group from accessing system log	Enabled
Retain application log	Not Defined
Retain security log	Not Defined
Retain system log	Not Defined
Retention method for application log	As needed
Retention method for security log	As needed
Retention method for system log	As needed

2.2.3 Security options

Accounts: Administrator account status	
	Enabled
Accounts: Guest account status	Disabled
Accounts: Limit local account use of blank passwords to console logon only	Enabled
Accounts: Rename administrator account	Sysop Nihil
Accounts: Rename guest account Audit: Audit the access of global system objects	Disabled
Audit: Audit the access of groom system objects Audit: Audit the use of Backup and Restore privilege	Disabled
Audit: Shut down system immediately if unable to log security audits	Disabled
DCOM: Machine Access Restrictions in Security Descriptor Definition Language (SDDL) syntax	Not Defined
DCOM: Machine Launch Restrictions in Security Descriptor Definition Language (SDDL) syntax	Not Defined
Devices: Allow undock without having to log on	Disabled
Devices: Allowed to format and eject removable media	Administrators
Devices: Prevent users from installing printer drivers	Enabled
Devices: Restrict CD-ROM access to locally logged-on user only	Enabled
Devices: Restrict floppy access to locally logged-on user only	Enabled
Devices: Unsigned driver installation behavior	Warn but allow installation
Domain controller: Allow server operators to schedule tasks	Disabled
Domain controller: LDAP server signing requirements	None Disabled
Domain controller: Refuse machine account password changes Domain member: Digitally encrypt or sign secure channel data (always)	Disabled Disabled
Domain member: Digitally encrypt of sign secure channel data (when possible)	Enabled
Domain member: Digitally sign secure channel data (when possible)	Enabled
Domain member: Disable machine account password changes	Disabled
Domain member: Maximum machine account password age	30 days
Domain member: Require strong (Windows 2000 or later) session key	Disabled
Interactive logon: Display user information when the session is locked	Not Defined
Interactive logon: Do not display last user name	Enabled
Interactive logon: Do not require CTRL+ALT+DEL	Disabled
Interactive logon: Message text for users attempting to log on	L'accès à CAMEO est limité aux
utilisateurs autorisés.,Le manquement aux modes opératoires de sécurité (SecOPs) peut avoir comme con	
vérifier la conformité avec les SecOPs l'activité sur ce système peut être surveillée.,Access to CAMEO is	
only., Failure to comply with Security Operating Procedures (SecOPs) may result in disciplinary action.,	To verify compliance with SecOPs
activity on this system may be audited.	
Interactive logon: Message title for users attempting to log on	Legal Notice
Interactive logon: Number of previous logons to cache (in case domain controller is not available)	0 logons
Interactive logon: Prompt user to change password before expiration	14 days
Interactive logon: Require Domain Controller authentication to unlock workstation	Enabled Not Defined
Interactive logon: Require smart card Interactive logon: Smart card removal behavior	Lock Workstation
Microsoft network client: Digitally sign communications (always)	Disabled
Microsoft network client: Digitally sign communications (if server agrees)	Enabled
Microsoft network client: Send unencrypted password to third-party SMB servers	Disabled
wheresoft network server. Amount of fale time required before suspending session	10 minutes
Microsoft network server: Amount of idle time required before suspending session Microsoft network server: Digitally sign communications (always)	
	10 minutes
Microsoft network server: Digitally sign communications (always)	10 minutes Disabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees)	10 minutes Disabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled Disabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths Network access: Restrict anonymous access to Named Pipes and Shares	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths Network access: Restrict anonymous access to Named Pipes and Shares Network access: Shares that can be accessed anonymously	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled Enabled Enabled Disabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths Network access: Restrict anonymous access to Named Pipes and Shares Network access: Shares that can be accessed anonymously Network access: Sharing and security model for local accounts	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled Disabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths Network access: Restrict anonymous access to Named Pipes and Shares Network access: Shares that can be accessed anonymously Network access: Sharing and security model for local accounts themselves	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled Enabled Enabled Disabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths Network access: Restrict anonymous access to Named Pipes and Shares Network access: Shares that can be accessed anonymously Network access: Sharing and security model for local accounts	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled Classic - local users authenticate as
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths Network access: Restrict anonymous access to Named Pipes and Shares Network access: Shares that can be accessed anonymously Network access: Sharing and security model for local accounts themselves Network security: Do not store LAN Manager hash value on next password change	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled Classic - local users authenticate as Enabled
Microsoft network server: Digitally sign communications (always) Microsoft network server: Digitally sign communications (if client agrees) Microsoft network server: Disconnect clients when logon hours expire Network access: Allow anonymous SID/Name translation Network access: Do not allow anonymous enumeration of SAM accounts Network access: Do not allow anonymous enumeration of SAM accounts and shares Network access: Do not allow storage of credentials or .NET Passports for network authentication Network access: Let Everyone permissions apply to anonymous users Network access: Named Pipes that can be accessed anonymously Network access: Remotely accessible registry paths Network access: Remotely accessible registry paths and sub-paths Network access: Restrict anonymous access to Named Pipes and Shares Network access: Shares that can be accessed anonymously Network access: Sharing and security model for local accounts themselves Network security: Do not store LAN Manager hash value on next password change Network security: Force logoff when logon hours expire	10 minutes Disabled Enabled Enabled Disabled Enabled Enabled Enabled Enabled Enabled Classic - local users authenticate as Enabled Enabled
