# CAMEO

ISSUES (SCISM) &

PROPOSALS (EEAS)

*Andrei Popovici, EEAS-EXT*

e-mail: Andrei-Mihai.Popovici@ext.eeas.europa.eu

❑ Issue to solve:

SDA Access request

Answer

Content Manager (CM)

ISSUES & PROPOSALS

❑ Issue to solve:

Routine

- Documents
- Calendar

MS

- Documents
- Calendar

xyz

- Documents
- Calendar

Current structure should be changed:

-Naming

-Management difficulties

European Union
EXTERNAL ACTION

❑ Proposed solution:

▪ **Evolving CAMEO SDA structure**

- The current CAMEO SDA structure will evolve
- Additional proposed SDAs (see table below, ▭ = to be added)

L0	L1	L2	L3….
ROUTINE	See production	Content Manger's design	
MSx	e.g. DE, NL, UK etc	e.g OHQ, FHQ, MOD etc	
EU EXERCISES	e.g. MILEX 15 | 16 etc	e.g DISTAFF, OHQ, FHQ	
OPS-MISSIONS	e.g. EUTM CAR, MALI etc	Content Manger's design	
USER COMMUNITIES	e.g. SATCEN, EUMS etc	Content Manger's design	

- **Evolving CAMEO SDA structure**

  - Lx = levels of depth in the SDA structure

  - Existing SDAs will be kept in the new structure or archived (TBD)

  - Length of name for L2 = 15 chars (to see entire name in the navigation area)

  - Content Managers (CMs) to be nominated by EUMS IMC and assigned to CM Roles attached to SDAs by CAMEO Manager

  - For an account Acc1 to gain visibility in an SDA structure like ROOT (L0)/ SDAx(L1) / SDA1(L2) / SDA2(L3) where there are different CMs at each level Lx, e.g. {CMx(SDAx), CM1(SDA1), CM2(SDA2)}, CM2 must follow the following steps:

    - ➢ Step1: Request to CMx that Acc1 is assigned to Associate (SDAx) in order to see the SDA structure of SDAx

    - ➢ Step2: Request to CM1that Acc1 is assigned to Associate (SDA1) in order to get visibility within SDA1

    - ➢ Step3: CM2 assigns Acc1 to the appropriate role within SDA2 (CM | Contributor | Associate) based on "need to know"/"need to share" principles.

ISSUES & PROPOSALS

■ Roles capabilities in CAMEO

Role / Capability	Account Management	Create / Delete SDA (L1)	Create / Delete subSDA (L2)	Create / Delete subSDA (L3, L4 etc)	Assign account to CM role	Assign existing CAMEO account to groups	Assign existing CAMEO account /group to role	Grant access rights to folders and docs in an SDA	Create Folder	Upload updated document in (sub)SDA / Folder
CAMEO Manager	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y
Content Manager	N	N	Y	Y	Y	Y	Y	Y	Y	Y
Contributor	N	N	N	N	N	N	N	N	N	Y
Associate	N	N	N	N	N	N	N	N	N	N

Default access rights (AR) of roles within an SDA :

AR / Role	CM	Contributor	Associate
Read	Y	Y	Y
Write	Y	Y	N
Delete	Y	N	N
Assign	Y	N	N

- **Default access rights (AR) of roles to Document/Folder/Calendar/Forum:**

AR / Role	CM	Contributor	Associate
NoAccess	N	N	N
Read	Y	Y	Y
Write	Y	Y	N
Delete	Y	N	N
Assign	Y	N	N

- **Default access rights (AR) of roles to Document/Folder/Calendar/Forum:**

    - Default access rights coming with the role can be refined by CM for specific accounts that belong to the role.

    - Example: Acc1 belongs to Associate role. For a specific document within a folder, the CM can grant Acc1 the "Delete" access right or even "Assign", meaning that for the respective document, Acc1 has the same privileges like the CM. This could apply particularly to authors of documents, to give them the freedom to manage the access to documents they produced within the folder and the (sub)SDA where they have been assigned.

ISSUES & PROPOSALS

- **Default access rights (AR) of roles to Document/Folder/Calendar/Forum:**

    - A CM can be assigned to ROUTINE SDA to manage / refine accounts/groups access to existing documents of PUBLIC interest;

    - Example: assign external accounts (i.e assigned to MSx SDA) to have AR = R to ROUTINE docs (normally available for accounts belonging to EUMS SDAs)

    - CM can refine access of accounts according to previous table to any objects like Document / Folder /Calendar / Forum.

ISSUES & PROPOSALS

- **Proposed workflow:**

  - Requests of creation of new SDAs (L0) and sub-SDAs (L1) must be submitted and confirmed by SCISM. SCISM continues to be the gateway in relation with this type of requests.

  - Requests of appointments of CMs for SDAs(L0) and SDAs(L1) should be submitted and confirmed by SCISM. SCISM continues to be the gateway in relation with this type of requests.

  - Requests for access to Documents / Folders / Calendar / Forum within a sub-SDA (L2 and below) can be submitted to and implemented directly by the appointed CMs for the respective sub-SDAs (provided the respective accounts requesting access are already created in CAMEO and irrespective to what SDA they belong)

- **Posibility of a transition from nominal CAMEO accounts (EUMS) to functional CAMEO accounts**
  - Member States are using functional accounts in their SDAs
  - EUMS has expressed an interest to use functional accounts instead of the nominal accounts which are currently used
  - The existing CAMEO nominal accounts cannot have their CAMEO name edited according to a new functional name. The only attribute of a CAMEO account that can be modified is its status, i.e. (Active, Inactive).
  - EUMS can start using functional account names only for future accounts that will be granted access to CAMEO.
